

# Interxion Announces Paris Digital Park

4/21/2020

New 19 MW Data Centre Commences Major Expansion in France

PARIS, 21st April, 2020. **Interxion**, a leading European provider of carrier- and cloud-neutral colocation data centre services and a Digital Realty (NYSE: DLR) company, today announced that it has begun the construction of a major expansion project in Paris. Named the Interxion Paris Digital Park, the new site has access to up to 85 megawatts ("MW") of customer available power and will accommodate four data centres spanning a total of approximately 40,000 square metres of equipped space.

This major development represents a strategic expansion of PlatformDIGITAL™ in France, enabling customers to deploy their critical infrastructure with a global data centre provider in one of the leading Cloud and Interconnection Hubs in Europe, where a thriving community of connectivity providers, platforms and enterprises has been developed over the past 20 years.

The first data centre on the site will be Interxion's eighth data centre in Paris ("PAR8"). PAR8 is being constructed in three phases, delivering, in aggregate, 9,600 square metres of equipped space and 19 MW of customer available power when fully built out. The first phase of PAR8, which is expected to provide approximately 3,200 square metres, is scheduled to open in late 2021. The capital expenditure associated with PAR8, excluding land and other shared costs for the site, is expected to be approximately €207 million.

Adjacent to Interxion's existing PAR7 facility, the Interxion Paris Digital Park will benefit from the high levels of network connectivity at the company's seven existing data centres across Paris, all of which are inter-connected.

"We continue to experience solid demand across our pan-European footprint, with the cloud and content platform providers, in particular, continuing to expand their presence in the key European cities," said David Ruberg, Chief Executive Officer of Interxion, a Digital Realty company. "Interxion Paris Digital Park meets the key requirements of

local and international customers with access to dense network connectivity, available power and line of sight to substantial expansion capacity and will keep us at the forefront of the Paris market opportunity.”

#### Forward-looking Statements

This press release contains forward-looking statements which are based on current expectations, forecasts and assumptions that involve risks and uncertainties that could cause actual outcomes and results to differ materially, including the construction of Interxion Paris Digital Park, expected IT load, square footage, timeline to completion and costs, the inability to utilise the capacity of newly planned data centres and data centre expansions, delays in connection with the development of new data centres or data centre expansions, significant competition, the cost and supply of electrical power, and data centre industry over-capacity. For a list and description of such risks and uncertainties, see the reports and other filings by the company with the U.S. Securities and Exchange Commission. The company disclaims any intention or obligation to update or revise any forward-looking statements, whether as a result of new information, future events or otherwise.
