## Reconciliation of Operating Cash Flow to Free Cash Flow

Free cash flow is considered to be a non-GAAP financial measure. We believe that free cash flow, which measures our ability to generate cash from our business operations, is an important financial measure for use in evaluating Etsy's financial performance. Free cash flow should be considered in addition to, rather than as a substitute for, consolidated net income as a measure of our performance and net cash provided by operating activities as a measure of our liquidity. We believe it is important to view free cash flow as a measure that provides supplemental information to our Consolidated Statements of Cash Flows.
