Poised for Growth

Investor Update: August 2018
Cautionary Statement Regarding Forward-Looking Information

Much of the information contained in this presentation is forward-looking information based upon management’s current expectations and projections that involve risks and uncertainties. Forward-looking information includes, among other things, information concerning earnings per share, rate case activity, earnings per share growth, cash flow, dividend growth and dividend payout ratios, capital plans, construction costs, generating unit retirements, investment opportunities, corporate initiatives (including any generation reshaping plan), rate base, and environmental matters (including emission reductions). Readers are cautioned not to place undue reliance on this forward-looking information. Forward-looking information is not a guarantee of future performance and actual results may differ materially from those set forth in the forward-looking information.

In addition to the assumptions and other factors referred to in connection with the forward-looking information, factors that could cause WEC Energy Group’s actual results to differ materially from those contemplated in any forward-looking information or otherwise affect our future results of operations and financial condition include, among others, the following: general economic conditions, including business and competitive conditions in the company’s service territories; timing, resolution and impact of future rate cases and other regulatory decisions; the company’s ability to continue to successfully integrate the operations of its subsidiaries; availability of the company’s generating facilities and/or distribution systems; unanticipated changes in fuel and purchased power costs; key personnel changes; varying weather conditions; continued industry consolidation; cyber-security threats; the value of goodwill and its possible impairment; construction risks; equity and bond market fluctuations; the impact of tax reform and any other legislative and regulatory changes, including changes to existing and/or anticipated environmental standards; current and future litigation and regulatory investigations; changes in accounting standards; and other factors described under the heading “Factors Affecting Results, Liquidity, and Capital Resources” in Management’s Discussion and Analysis of Financial Condition and Results of Operations and under the headings “Cautionary Statement Regarding Forward-Looking Information” and “Risk Factors” contained in WEC Energy Group’s Form 10-K for the year ended December 31, 2017 and in subsequent reports filed with the Securities and Exchange Commission. WEC Energy Group expressly disclaims any obligation to publicly update or revise any forward-looking information.

What’s New?
Confident in Achieving Our EPS Growth Guidance

2018 earnings guidance increased to $3.32 per share. Original guidance was $3.26 - $3.30

- (1) Growth rates off 2015 base of $2.72 per share and 2017 adjusted EPS
- (2) Based on 2017 guidance midpoint of $3.09 per share

*See Appendix 2 for reconciliation of adjusted amounts to GAAP amounts
Investment in Bishop Hill III Wind Energy Center

- Developed by Invenergy and placed into service in May 2018
- Located in Henry County, Illinois
- Total investment: $148 million for an 80% ownership interest
- Expected to provide returns that are higher than those in our regulated business
  - Approximately mid-8% unlevered internal rate of return
- Qualifies for 100% bonus depreciation and production tax credits
- 22-year offtake agreement with a current wholesale customer, WPPI Energy
- Subject to FERC approval
- Closing anticipated by October 2018

53 GE wind turbines with a capacity of ~132 MW
Investment in Upstream Wind Energy Center

- Currently being built by Invenergy in Antelope County, Nebraska
- Total investment: $276 million for an 80% ownership interest
- Expected to provide returns that are higher than those in our regulated business
  - Approximately mid-8% unlevered internal rate of return
- Qualifies for 100% bonus depreciation and production tax credits
- 10-year offtake agreement with affiliate of an A-rated publicly traded company (Allianz)
- Subject to FERC approval
- Closing anticipated in early 2019 after commercial operation is achieved

81 GE wind turbines with a capacity of ~200 MW
Wisconsin Public Service
Proposed Solar Generation

- Wisconsin Public Service and Madison Gas & Electric have partnered on two major solar projects
  - Badger Hollow Solar Farm
    - Located in Iowa County, Wisconsin
    - WPS would own 100 MW (MGE 50 MW)
    - Project being developed by Invenergy
  - Two Creeks Solar Project
    - Located in Two Rivers, Wisconsin
    - WPS would own 100 MW (MGE 50 MW)
    - Project being developed by NextEra Energy Resources
  - WPS total purchase price of ~ $260 million
  - Commercial operation targeted for 2020

~200 MW of combined output for WPS at two locations

~$1,300/KW Cost per Unit of Capacity
5-Year Capital Plan

Reshaping our Generation Fleet for a Clean, Reliable Future

We have set aggressive goals to reduce carbon dioxide emissions by approximately 40 percent below 2005 levels by 2030 and 80 percent by 2050.

Balancing reliability and customer cost with environmental stewardship

- Taken as a whole, changes to our generation fleet should reduce costs to customers, preserve fuel diversity and reduce carbon emissions.

- Reshaping our generation includes:
  - Retiring older, fossil-fueled generating units
  - Building state-of-the-art, natural gas generation
  - Investing in cost-effective, zero-carbon generation
Retiring Coal-Fueled Generation

- Our plan includes retiring more than 1,800 megawatts (MW) of coal generation by 2020
  - Pulliam Power Plant
    - 200 MW
    - Expected by the end of October 2018
  - Edgewater 4
    - WPS share – 100 MW
    - Expected end of third quarter 2018
  - Presque Isle Power Plant
    - 350 MW
    - Expected in the second quarter of 2019
  - Pleasant Prairie Power Plant
    - 1,190 MW
    - Retired April 2018

Expect to achieve our 2030 targeted CO₂ reductions by 2023
Building Natural Gas-Fueled Generation

400+ MW of natural gas-fueled generation

- U.P. of Michigan (UMERC)
  - RICE generation
  - 180 MW
  - Expected in-service – second quarter 2019
- West Marinette (WPS)
  - RICE generation
  - 50 MW
  - Anticipated need – 2021
- Option to invest in West Riverside Energy Center
  - Combined cycle
  - 200 MW
  - 2020-2022
- Additional projects being actively developed

Reciprocating Internal Combustion Engines (RICE) are modular, run on natural gas and allow for reliable and flexible operations.
Investing in Zero-Carbon Generation

- Solar
  - WPS – asset purchase – 200 MW from developers (Certificates of Authority filed for approval 5/31)
  - We Energies – plan to purchase 150 MW from developer
  - Qualifies for Investment Tax Credit (ITC)

- Battery storage
  - Option to add as part of solar developments, if cost effective

- Additional projects being actively developed

Solar generation technology has greatly improved, become more cost-effective and complements our summer demand curve.
Achieving Our Carbon Goal

Achieved and anticipated CO$_2$ reductions (mass)

Reduction Goals:

40% below 2005 levels by 2030.

80% below 2005 levels by 2050.

Milestone years
Sources of Electric Energy Supply by Fuel Type

2005A
- Coal: 73%
- Natural Gas: 20%
- Carbon Free: 7%

2017A
- Coal: 53%
- Natural Gas: 21%
- Carbon Free: 26%

2030 Estimated
- Coal: 37%
- Natural Gas: 34%
- Carbon Free: 29%
Peoples Gas
Natural Gas System Modernization Program

Extensive effort to modernize natural gas infrastructure in city of Chicago

- Ultimately replace 2,000 miles of piping
- Approximately 25% complete*

Investment recovery under a monthly rider

- Project $280-$300 million average annual investment
- Illinois law authorizes rider through 2023

*Total program completion percentage is based on the weighted average of program categories that comprise the major components of the SMP project
New Generation in Upper Peninsula

- Provides a long-term generation solution for electric reliability in Upper Peninsula
- Estimated $266 million ($277 million including AFUDC) investment to be made by Michigan utility – UMERC
  - Half of investment recovered in retail rates
  - Half of investment recovered by 20-year agreement with Cliffs Natural Resources
- Allows for retirement of Presque Isle Power Plant
- Received approval and final written order on October 25, 2017

~180 MW of clean, natural gas-fired generation from Reciprocating Internal Combustion Engines (RICE)

Commercial operation targeted for 2019
Local Economy
Foxconn announced July 26, 2017, Wisconsin’s largest economic development project and largest corporate attraction project in U.S. history, as measured by jobs.

- Expected capital investment by Foxconn of $10 billion dollars
- Goal of creating 13,000 jobs, with an average salary of $53,875, plus benefits
- Estimated 22,000 indirect jobs created throughout Wisconsin
- Largest greenfield investment by a foreign-based company in U.S. history as measured by jobs
- One of the largest manufacturing campuses in the world
- Plans to be operational in 2020

</tbody>
</table>

1) For comparative purposes, these percentages include retail natural gas sales volume information for both Wisconsin Electric Power Company and Wisconsin Public Service Corporation for the year ended December 31, 2015. Because Integrys was acquired effective June 29, 2015, we are including both actual and normalized sales volumes for Wisconsin Public Service that were recognized prior to the acquisition and are not reflected in our 2015 financial statements.

2) An adjustment for 2016 leap year is factored into these percentages.

3) Year to date.

4) Excluding sales for power generation.
Solid Dividend Growth Continues

- 13.5% compound annual growth rate off 2010 base
- Continuing to target dividend payout of 65-70% of earnings
- Projecting dividend growth in line with earnings growth

Key Takeaways for WEC Energy Group

- Track record of exceptional performance
- Portfolio of premium businesses
- Investment opportunities support 5-7 percent EPS growth with minimal rate impact
- Dividend growth projected to be in line with earnings growth
- No need to issue additional equity through the forecast period
- Poised to deliver among the best risk-adjusted returns in the industry
Appendix #1
Still Recognizing Benefits from Acquisition

- WEC Energy Group formed in 2015 when Wisconsin Energy acquired Integrys in a transaction valued at $9 billion

- Acquisition created the leading electric and natural gas utility in the Midwest
  - Based on the number of customers, WEC Energy Group is the eighth-largest natural gas distributor in the U.S.

- Met or exceeded WEC’s acquisition criteria
  - Accretive to earnings per share starting in first full calendar year of combined operations
  - Largely credit neutral
  - Long-term growth prospects of combined entity equal to or greater than stand-alone company
**Tax Reform Summary**

- Beneficial to customers
- No equity issuances required
- No resulting change to 2018 guidance, long-term growth rate or capital plan
- Maintaining FFO-to-debt in the range of 16 to 18 percent
- Estimated to be a partial cash taxpayer in 2019

<table>
<thead>
<tr>
<th>State</th>
<th>Tax Treatment</th>
</tr>
</thead>
</table>
| Wisconsin | On May 24, the PSCW issued written order (for 2018 and 2019):  
  - **WEPCO electric**: 80% of the tax benefit will offset regulatory asset balances, and 20% will be refunded in the form of a bill credit to customers.  
  - **WPS electric**: 40% of the tax benefit will offset regulatory asset balances, and 60% will be refunded in the form of a bill credit to customers.  
  - **Natural gas**: 100% returned to customers through bill credits. |
| Illinois  | On April 19, the ICC approved the proposed bill rider that will return the federal tax savings to customers, partially offset by an increase in state taxes. |
| Michigan  | MPSC issued an order on Feb. 22, requiring each Michigan utility to make multiple filings addressing estimated rate impacts.  
  - Three step approach:  
    1. Approved May 30 – Ongoing credit for tax reform  
    2. July – Filing for tax reform refund for Jan - Jun  
    3. October – Remeasurement of deferred tax balances |
| Minnesota | The impact of tax reform has been factored into the currently pending rate case.  
  - Interim rates have been adjusted to reflect the reduction in the federal tax rate. |
Saving for Growth

Reduced O&M leads to incremental capital investment opportunities

Every dollar in O&M savings results in approximately $8 of capital investment opportunities, with no expected impact to customer rates

* Based on a 30-year utility project at Wisconsin Electric

Delivering the Future

Infrastructure Resilience

• Installing 2,200 miles of underground circuits to replace troublesome overhead lines, and adding distribution automation equipment through our System Modernization and Reliability Project at WPS
  • Phase 1 of project is approximately 90% complete
  • Phase 2 of project is underway

Infrastructure Redesign

• Major investments planned to address aging infrastructure
  • Expect to spend $2.7 billion over the next 5 years on electric delivery
  • Committed to delivering the future with infrastructure that will reduce operating costs and meet new environmental standards

Technology Enhancements

• Advanced metering program that uses integrated system of smart meters to enable two-way communication between utilities and customers
  • Upgrading the customer information system at We Energies
Increasing Natural Gas Distribution Investment

<tr>
<td>Adjusted EPS – Non-GAAP basis*</td>
<td>$ 3.14</td>
<td>$ 2.97</td>
</tr>
</tbody>
</table>

* WEC Energy Group has provided adjusted earnings per share (non-GAAP earnings per share) as a complement to, and not as an alternative to, reported earnings per share presented in accordance with GAAP. Adjusted earnings per share exclude a one-time reduction in income tax expense related to a revaluation of our deferred taxes as a result of the Tax Cuts and Jobs Act of 2017 as well as costs related to the acquisition of Integrys, neither of which is indicative of WEC Energy Group’s operating performance. Therefore, WEC Energy Group believes that the presentation of adjusted earnings per share is relevant and useful to investors to understand the company’s operating performance. Management uses such measures internally to evaluate the company’s performance and manage its operations.
