Cautionary Statement Regarding Forward-Looking Information

Much of the information contained in this presentation is forward-looking information based upon management’s current expectations and projections that involve risks and uncertainties. Forward-looking information includes, among other things, information concerning earnings per share, rate case activity, earnings per share growth, cash flow, dividend growth and dividend payout ratios, capital plans, construction costs, generating unit retirements, investment opportunities, corporate initiatives (including any generation reshaping plan), rate base, and environmental matters (including emission reductions). Readers are cautioned not to place undue reliance on this forward-looking information. Forward-looking information is not a guarantee of future performance and actual results may differ materially from those set forth in the forward-looking information.

In addition to the assumptions and other factors referred to in connection with the forward-looking information, factors that could cause WEC Energy Group’s actual results to differ materially from those contemplated in any forward-looking information or otherwise affect our future results of operations and financial condition include, among others, the following: general economic conditions, including business and competitive conditions in the company’s service territories; timing, resolution and impact of future rate cases and other regulatory decisions; the company’s ability to continue to successfully integrate the operations of its subsidiaries; availability of the company’s generating facilities and/or distribution systems; unanticipated changes in fuel and purchased power costs; key personnel changes; varying weather conditions; continued industry consolidation; cyber-security threats; the value of goodwill and its possible impairment; construction risks; equity and bond market fluctuations; the impact of tax reform and any other legislative and regulatory changes, including changes to existing and/or anticipated environmental standards; current and future litigation and regulatory investigations; changes in accounting standards; and other factors described under the heading “Factors Affecting Results, Liquidity, and Capital Resources” in Management’s Discussion and Analysis of Financial Condition and Results of Operations and under the headings “Cautionary Statement Regarding Forward-Looking Information” and “Risk Factors” contained in WEC Energy Group’s Form 10-K for the year ended December 31, 2017 and in subsequent reports filed with the Securities and Exchange Commission. WEC Energy Group expressly disclaims any obligation to publicly update or revise any forward-looking information.
Company Statistics

$19.9 billion market cap (1)
1.6 million electric customers
2.9 million natural gas customers
60% ownership of American Transmission Company
69,600 miles of electric distribution
48,000 miles of gas distribution
$18.5 billion of rate base (2)
99+% regulated (3)

(1) As of 5/31/2018

What’s New?
## Tax Reform Summary

- Beneficial to customers
- No equity issuances required
- No change to 2018 guidance, long-term growth rate or capital plan
- Maintaining FFO-to-debt in the range of 16 to 18 percent
- Estimated to be a partial cash taxpayer in 2018, full cash taxpayer in 2019

<table>
<thead>
<tr>
<th>State</th>
<th>Tax Treatment</th>
</tr>
</thead>
</table>
| Wisconsin | On May 24, the PSCW issued written order (for 2018 and 2019):  
- **WEPCO electric**: 80% of the tax benefit will offset regulatory asset balances, and 20% will be refunded in the form of a bill credit to customers.  
- **WPS electric**: 40% of the tax benefit will offset regulatory asset balances, and 60% will be refunded in the form of a bill credit to customers.  
- **Natural gas**: 100% returned to customers through bill credits. |
| Illinois | On April 19, the ICC approved the proposed bill rider that will return the federal tax savings to customers, partially offset by an increase in state taxes. |
| Michigan | MPSC issued an order on Feb. 22, requiring each Michigan utility to make multiple filings addressing estimated rate impacts.  
- Three step approach:  
  1. Approved May 30 – Ongoing credit for tax reform  
  2. July – Filing for tax reform refund for Jan - Jun  
  3. October – Remeasurement of deferred tax balances |
| Minnesota | The impact of tax reform has been factored into the currently pending rate case.  
- Interim rates have been adjusted to reflect the reduction in the federal tax rate. |
Invenergy is currently building an upstream wind energy center in Antelope County, Nebraska, with a total investment of $276 million for an 80% ownership interest. The project is expected to provide returns higher than those in our regulated business, with an approximately mid-8% unlevered internal rate of return. It qualifies for 100% bonus depreciation and production tax credits. The project has a 10-year offtake agreement with an A-rated publicly traded company (Allianz) and is subject to FERC approval. Closing is anticipated in early 2019 after commercial operation is achieved.

81 GE wind turbines with a capacity of ~200 MW.
Wisconsin Public Service
Proposed Solar Generation

- Wisconsin Public Service and Madison Gas & Electric have partnered on two major solar projects

  - Badger Hollow Solar Farm
    - Located in Iowa County, Wisconsin
    - WPS would own 100 MW (MGE 50 MW)
    - Project being developed by Invenergy

  - Two Creeks Solar Project
    - Located in Two Creeks, Wisconsin
    - WPS would own 100 MW (MGE 50 MW)
    - Project being developed by NextEra Energy Resources

- WPS total purchase price of ~ $260 million
- Commercial operation targeted for 2020

~200 MW of combined output for WPS at two locations

~$1,300/KW Cost per Unit of Capacity
5-Year Capital Plan
2018-2022 Capital Plan by Category

Generation

- New Gas: $0.7 billion (8%)

*Annualized based on fourth quarter 2015 dividend of $0.4575

**Annualized based on first quarter 2018 dividend of $0.5525
Focus on efficiency

Reshaping our Generation Fleet for a Clean, Reliable Future

Balancing reliability and customer cost with environmental stewardship

Our goal is to work with industry partners, environmental groups and the state of Wisconsin with a goal of reducing CO₂ emissions by approximately 40 percent below 2005 levels by 2030.

- Taken as a whole, changes to our generation fleet should reduce costs to customers, preserve fuel diversity and reduce carbon emissions.

- Reshaping our generation includes:
  - Retiring older, fossil-fueled generating units
  - Building state-of-the-art, natural gas generation
  - Investing in cost-effective, zero-carbon generation
Retiring Coal-Fueled Generation

- Our plan includes retiring more than 1,800 megawatts (MW) of coal generation by 2020
  - Pulliam Power Plant
    - 200 MW
    - Expected by the end of 2018
  - Edgewater 4
    - WPS share – 100 MW
    - Expected end of third quarter 2018
  - Presque Isle Power Plant
    - 350 MW
    - Expected mid-2019
  - Pleasant Prairie Power Plant
    - 1,190 MW
    - Retired April 2018

Achieving targeted CO₂ reductions by 2022
Building Natural Gas-Fueled Generation

Reciprocating Internal Combustion Engines (RICE) are modular, run on natural gas and allow for reliable and flexible operations.

400+ MW of natural gas-fueled generation

- U.P. of Michigan (UMERC)
  - RICE generation
  - 180 MW
  - Expected in-service – by mid-2019
- West Marinette (WPS)
  - RICE generation
  - 50 MW
  - Anticipated need – 2021
- Option to invest in West Riverside Energy Center
  - Combined cycle
  - 200 MW
  - 2020-2022
- Additional projects being actively developed
Investing in Zero-Carbon Generation

- Solar
  - WPS – asset purchase – 200 MW from developers (Certificates of Authority filed for approval 5/31)
  - We Energies – plan to purchase 150 MW from developer
  - Qualifies for Investment Tax Credit (ITC)

- Battery storage
  - Option to add as part of solar developments, if cost effective
  - Qualifies for Investment Tax Credit (ITC)

- Additional projects being actively developed
Achieving Our Carbon Goal

Anticipated CO₂ Reductions

% Reduction from 2005

-60% -50% -40% -30% -20% -10% 0%

2005 2016 2022 2030

Reduction Goal 40% below 2005

Achieving Our Carbon Goal
Sources of Electric Energy Supply by Fuel Type

2005A
- Coal: 73%
- Natural Gas: 20%
- Carbon Free: 7%

2017A
- Coal: 53%
- Natural Gas: 21%
- Carbon Free: 26%

2022 Estimated
- Coal: 34%
- Natural Gas: 26%
- Carbon Free: 40%
Delivering the Future

Infrastructure Resilience

- Installing 2,200 miles of underground circuits to replace troublesome overhead lines, and adding distribution automation equipment through our System Modernization and Reliability Project at WPS
  - Phase 1 of project is approximately 90% complete
  - Phase 2 of project is underway

Infrastructure Redesign

- Major investments planned to address aging infrastructure
- Expect to spend $2.7 billion over the next 5 years on electric delivery
- Committed to delivering the future with infrastructure that will reduce operating costs and meet new environmental standards

Technology Enhancements

- Advanced metering program that uses integrated system of smart meters to enable two-way communication between utilities and customers
- Upgrading the customer information system at We Energies
Wisconsin Public Service
System Modernization and Reliability Project

Phase 1 – install 1,200 miles of underground circuits and add distribution automation equipment on 400 miles

- Project $220 million investment

Phase 2 – underground an additional 1,000 miles

- Project $210 million investment

Expect both phases to be complete by 2021
Investment recovery under a monthly rider

- Project $280-$300 million average annual investment
- Illinois law authorizes rider through 2023

*Total program completion percentage is based on the weighted average of program categories that comprise the major components of the SMP project
Advanced Metering Infrastructure (AMI) Program

- Real-time data for faster identification of meter condition, theft of electric service and outage management
- Reduce manual work and deliver timely and accurate bills for customers
- Benefits from implementation of remote disconnection and reconnection capabilities:
  - Reduce truck rolls
  - Create efficiencies in back office and care center
  - Save lost revenue by disconnecting nonpaying customers
- Project to spend approximately $360 million through 2022 across four states we serve
Well Positioned for the Future

Acquisition of Bluewater Natural Gas Holding

- Bluewater entered into long-term service agreements with the three Wisconsin gas utilities
- Total acquisition price: $230 million
- Working gas capacity of 23.2 Bcf
- Expected to provide a utility return on capital
- Public Service Commission of Wisconsin granted declaratory ruling and approval on June 15, 2017
- Closed acquisition on June 30, 2017

Underground natural gas storage facilities in Michigan that will provide one-third of the storage needs for our natural gas distribution companies in Wisconsin
Major Construction Projects

New Generation in Upper Peninsula

- Provides a long-term generation solution for electric reliability in Upper Peninsula
- Estimated $266 million ($277 million including AFUDC) investment to be made by Michigan utility – UMERC
  - Half of investment recovered in retail rates
  - Half of investment recovered by 20-year agreement with Cliffs Natural Resources
- Allows for retirement of Presque Isle Power Plant
- Received approval and final written order on October 25, 2017

~180 MW of clean, natural gas-fired generation from Reciprocating Internal Combustion Engines (RICE)

Commercial operation targeted for 2019

Procurement is 60% complete

Construction is 13% complete
Foxconn announced July 26, 2017, Wisconsin’s largest economic development project and largest corporate attraction project in U.S. history, as measured by jobs.

- Capital investment by Foxconn of $10 billion dollars
- Goal of creating 13,000 jobs, with an average salary of $53,875, plus benefits
- Estimated 22,000 indirect jobs created throughout Wisconsin
- Largest greenfield investment by a foreign-based company in U.S. history as measured by jobs
- One of the largest manufacturing campuses in the world
- Plans to be operational in 2020

Source: inWisconsin.com
Key Takeaways for WEC Energy Group

- Track record of exceptional performance
- Portfolio of premium businesses
- Investment opportunities support 5-7 percent EPS growth with minimal rate impact
- Dividend growth projected to be in line with earnings growth
- No need to issue additional equity through the forecast period
- Poised to deliver among the best risk-adjusted returns in the industry
Electric Distribution

Natural Gas Distribution

Electric Generation

Non-Utility Energy Infrastructure

Electric Transmission

60% ownership
Still Recognizing Benefits from Acquisition

- WEC Energy Group formed in 2015 when Wisconsin Energy acquired Integrys in a transaction valued at $9 billion.

- Acquisition created the leading electric and natural gas utility in the Midwest.
  - Based on the number of customers, WEC Energy Group is the eighth-largest natural gas distributor in the U.S.

- Met or exceeded WEC’s acquisition criteria:
  - Accretive to earnings per share starting in first full calendar year of combined operations.
  - Largely credit neutral.
  - Long-term growth prospects of combined entity equal to or greater than stand-alone company.
Saving for Growth

Reduced O&M leads to incremental capital investment opportunities

Every dollar in O&M savings results in approximately $8 of capital investment opportunities, with no expected impact to customer rates.

*Based on a 30-year utility project at Wisconsin Electric*
Earnings Growth Drivers

2017 average rate base ($ billions)

- **Utilities**: $13.4 billion
  - Projected capital spend from 2018–2022: ~ $10.7B

- **Energy Infrastructure**: $3.0 billion
  - Projected capital spend from 2018-2022: ~ $1.1B
  - Includes ~ $200M of capital spend at We Power

- **ATC**: $2.1 billion
  - Projected capital spend from 2018-2022: ~ $1.6B

Total: $18.5 billion
**Line of Business View**

**Capital Plan Drives 5% to 7% EPS Growth**

1) For comparative purposes, these percentages include retail natural gas sales volume information for both Wisconsin Electric Power Company and Wisconsin Public Service Corporation for the year ended December 31, 2015. Because Integrys was acquired effective June 29, 2015, we are including both actual and normalized sales volumes for Wisconsin Public Service that were recognized prior to the acquisition and are not reflected in our 2015 financial statements.

2) An adjustment for 2016 leap year is factored into these percentages.

3) Including interruptible sales.

4) Excluding sales for power generation.

## Regulatory and Open Docket Update

### Wisconsin (apps.psc.wi.gov)
- Decision regarding proposed rate case settlement for all Wisconsin utilities (Dockets: We Energies – 5-UR-108 and WPS – 6690-UR-125)
- Received approval on acquisition of Bluewater Natural Gas Holding Co.
- Received approval on Forward Wind Center
- Decision on new solar generation projects (Docket: 5-BS-228)

### Illinois (icc.illinois.gov)
- Final Commission order on System Modernization Project (Docket 16-0376)
- Decision on 2015 QIP reconciliation (Docket: 16-0197)
- No rate case filing expected for 2018

### Michigan (michigan.gov/mpsc)
- Received approval on proposed new generation of natural-gas-fired Reciprocating Internal Combustion Engines (RICE) in the Upper Peninsula (Docket U-18224)

### Minnesota (mn.gov/puc)
- Interim rate increase of $9.5 million or 3.8% effective January 1, 2018*
- Decision on proposed base rate increase of $12.6 million or 5.0%

### FERC (ferc.gov)
- Decision on second MISO/ATC ROE Complaint (Docket EL15-45)

---

* Interim rates decreased by $2.5 million to $7.0 million on April 1, 2018 to reflect changes related to tax reform.
