Poised for Growth

Investor Update: May 2018
Cautionary Statement Regarding Forward-Looking Information

Much of the information contained in this presentation is forward-looking information based upon management’s current expectations and projections that involve risks and uncertainties. Forward-looking information includes, among other things, information concerning earnings per share, rate case activity, earnings per share growth, cash flow, dividend growth and dividend payout ratios, capital plans, construction costs, generating unit retirements, investment opportunities, corporate initiatives (including any generation reshaping plan), rate base, and environmental matters (including emission reductions). Readers are cautioned not to place undue reliance on this forward-looking information. Forward-looking information is not a guarantee of future performance and actual results may differ materially from those set forth in the forward-looking information.

In addition to the assumptions and other factors referred to in connection with the forward-looking information, factors that could cause WEC Energy Group’s actual results to differ materially from those contemplated in any forward-looking information or otherwise affect our future results of operations and financial condition include, among others, the following: general economic conditions, including business and competitive conditions in the company’s service territories; timing, resolution and impact of future rate cases and other regulatory decisions; the company’s ability to continue to successfully integrate the operations of its subsidiaries; availability of the company’s generating facilities and/or distribution systems; unanticipated changes in fuel and purchased power costs; key personnel changes; varying weather conditions; continued industry consolidation; cyber-security threats; the value of goodwill and its possible impairment; construction risks; equity and bond market fluctuations; the impact of tax reform and any other legislative and regulatory changes, including changes to existing and/or anticipated environmental standards; current and future litigation and regulatory investigations; changes in accounting standards; and other factors described under the heading “Factors Affecting Results, Liquidity, and Capital Resources” in Management’s Discussion and Analysis of Financial Condition and Results of Operations and under the headings “Cautionary Statement Regarding Forward-Looking Information” and “Risk Factors” contained in WEC Energy Group’s Form 10-K for the year ended December 31, 2017 and in subsequent reports filed with the Securities and Exchange Commission. WEC Energy Group expressly disclaims any obligation to publicly update or revise any forward-looking information.
Company Statistics

$20.3 billion market cap (1)
1.6 million electric customers
2.9 million natural gas customers
60% ownership of American Transmission Company
69,600 miles of electric distribution
48,000 miles of gas distribution
$18.5 billion of rate base (2)
99+% regulated (3)

(1) As of 4/30/2018
(2) 2017 average rate base
(3) Based on earnings from operations
Focused on the Fundamentals

Our strategy is to create long-term value by focusing on the fundamentals: safety, world-class reliability, operating efficiency, financial discipline and customer care.
Focused on the Fundamentals

A Decade of EPS Growth

$0.00 $1.00 $2.00 $3.00 $4.00

GAAP  Adjusted

8% Adjusted CAGR *

2nd year in a row

Best in America - 2017

Ranked #3 in our sector

Best in Midwest 7 years in a row

* 10% CAGR based off GAAP EPS that include a one-time, non-cash gain related to the Tax Cut and Jobs Act of 2017.
Proven Track Record of Performance

**Tax Reform Summary**

- Beneficial to customers
- No equity issuances required
- No change to 2018 guidance, long-term growth rate or capital plan
- Maintaining FFO-to-debt in the range of 16 to 18 percent
- Estimated to be a partial cash taxpayer in 2018, full cash taxpayer in 2019

<table>
<thead>
<tr>
<th>State</th>
<th>Tax Treatment</th>
</tr>
</thead>
</table>
| Wisconsin | On April 26, the PSCW determined (for 2018 and 2019):  
- 80% of the tax benefit would offset regulatory asset balances, and 20% be refunded in the form of a bill credit for **electric** customers.  
- 100% returned to customers through bill credits for **natural gas** customers.  
- No impact on net income |
| Illinois  | On April 19, the ICC approved the proposed bill rider that will return the federal tax savings to customers, partially offset by an increase in state taxes. |
| Michigan  | MPSC issued an order on Feb. 22, requiring each Michigan utility to make multiple filings addressing estimated rate impacts.  
- First filing to comply with that order was submitted on March 29. |
| Minnesota | The impact of tax reform has been factored into the currently pending rate case.  
- Interim rates have been adjusted to reflect the reduction in the federal tax rate. |
Increasing 5-Year Capital Plan by $2.1 billion

Former Plan:
- 2017-2021:
  - Generation: $1,659
  - Electric Delivery: $2,601
  - Gas Delivery: $5,234
  - Energy Infrastructure: $230

New Plan:
- 2018-2022:
  - Generation: $2,691
  - Electric Delivery: $2,707
  - Gas Delivery: $5,514
  - Energy Infrastructure: $911

$2.1 billion increase.
2018-2022 Capital Plan by Category

**Generation**
- New Gas $0.7
- New Renewables 0.9
- Maintenance Capital 0.9
- **Total** $2.5

**Energy Infrastructure** $0.9 8%

**Electric Distribution**
- Growth $0.7
- System Renewal 1.3
- Required Relocation 0.2
- SMRP 0.3
- **Total** $2.5

**Gas Distribution**
- SMP $1.5
- Growth 0.7
- System Renewal 1.4
- Required Relocation 1.0
- Manlove Storage 0.4
- **Total** $5.0

**Technology**
- Automated Meters $0.4
- Systems and Equipment 0.5
- **Total** $0.9

**Total of $11.8 billion**
Key Assumptions

- ATC’s 2017 average rate base: $3.5 billion
- Implies WEC’s average rate base growth of $144 million
- ROE currently under FERC review
- 5-year WEC projected capital investment:
  - Inside footprint: $1.3 billion
  - Outside footprint: $300 million
Confident in Achieving Our EPS Growth Guidance

2018 earnings guidance of $3.26 to $3.30 per share. Expect to reach top end of range

7.4% Growth Rate\(^{(1)}\)

5-7% CAGR off Midpoint of 2017 Guidance\(^{(2)}\)

(1) Growth rates off 2015 base of $2.72 per share and 2017 adjusted EPS
(2) Based on 2017 guidance midpoint of $3.09 per share

* Adjusted earnings per share exclude acquisition costs totaling 1 cent per share in 2016, and exclude a one-time, non-cash gain totaling 65 cents per share related to the new tax law in 2017.
Solid Dividend Growth Continues

- 13.5% compound annual growth rate off 2010 base
- Continuing to target dividend payout of 65-70% of earnings
- Projecting dividend growth in line with earnings growth

Annualized Dividends Per Share

- 2010: $0.80
- 2011: $1.04
- 2012: $1.20
- 2013: $1.445
- 2014: $1.56
- 2015: $1.83
- 2016: $1.98
- 2017: $2.08
- 2018: $2.21

Payout Ratios:
- 2010: 30.0%
- 2011: 15.4%
- 2012: 20.4%
- 2013: 8.0%
- 2014: 17.3%
- 2015: 8.2%
- 2016: 5.1%
- 2017: 6.25%
- 2018: 5-7%

*Annualized based on fourth quarter 2015 dividend of $0.4575
**Annualized based on first quarter 2018 dividend of $0.5525
Focus on efficiency

Reshaping our Generation Fleet for a Clean, Reliable Future

Balancing reliability and customer cost with environmental stewardship

Our goal is to work with industry partners, environmental groups and the state of Wisconsin with a goal of reducing CO₂ emissions by approximately 40 percent below 2005 levels by 2030.

- Taken as a whole, changes to our generation fleet should reduce costs to customers, preserve fuel diversity and reduce carbon emissions.

- Reshaping our generation includes:
  - Retiring older, fossil-fueled generating units
  - Building state-of-the-art, natural gas generation
  - Investing in cost-effective, zero-carbon generation
Retiring Coal-Fueled Generation

- Our plan includes retiring more than 1,800 megawatts (MW) of coal generation by 2020
  - Pulliam Power Plant
    - 200 MW
    - Expected by the end of 2018
  - Edgewater 4
    - WPS share – 100 MW
    - Expected end of third quarter 2018
  - Presque Isle Power Plant
    - 350 MW
    - Expected mid-2019
  - Pleasant Prairie Power Plant
    - 1,190 MW
    - Retired April 2018

Achieving targeted CO₂ reductions by 2022
Reciprocating Internal Combustion Engines (RICE) are modular, run on natural gas and allow for reliable and flexible operations.

Building Natural Gas-Fueled Generation

400+ MW of natural gas-fueled generation

- U.P. of Michigan (UMERC)
  - RICE generation
  - 180 MW
  - Expected in-service – by mid-2019

- West Marinette (WPS)
  - RICE generation
  - 50 MW
  - Anticipated need – 2021

- Option to invest in West Riverside Energy Center
  - Combined cycle
  - 200 MW
  - 2020-2022

- Additional projects being actively developed
Investing in Zero-Carbon Generation

- Solar
  - WPS – purchase 200 MW from developer
  - We Energies – purchase 150 MW from developer
  - Qualifies for Investment Tax Credit (ITC)

- Battery storage
  - Option to add as part of solar developments, if cost effective
  - Qualifies for Investment Tax Credit (ITC)

- Additional projects being actively developed

350+ MW of zero-carbon generation in Wisconsin by 2020
Achieving Our Carbon Goal

Anticipated CO₂ Reductions

Reduction Goal 40% below 2005
Sources of Electric Energy Supply by Fuel Type

- **2005A**
  - Coal: 73%
  - Natural Gas: 21%
  - Carbon Free: 7%

- **2017A**
  - Coal: 26%
  - Natural Gas: 53%
  - Carbon Free: 21%

- **2022 Estimated**
  - Coal: 26%
  - Natural Gas: 34%
  - Carbon Free: 40%

- **2030 Aspirational**
  - Coal: 34%
  - Natural Gas: 34%
  - Carbon Free: 32%

Coal  Natural Gas  Carbon Free
Delivering the Future

Infrastructure Resilience

• Installing 2,200 miles of underground circuits to replace troublesome overhead lines, and adding distribution automation equipment through our System Modernization and Reliability Project at WPS
  • Phase 1 of project is approximately 90% complete
  • Phase 2 of project is underway

Infrastructure Redesign

• Major investments planned to address aging infrastructure
  • Expect to spend $2.7 billion over the next 5 years on electric delivery
  • Committed to delivering the future with infrastructure that will reduce operating costs and meet new environmental standards

Technology Enhancements

• Advanced metering program that uses integrated system of smart meters to enable two-way communication between utilities and customers
  • Upgrading the customer information system at We Energies
Wisconsin Public Service

System Modernization and Reliability Project

Phase 1 – install 1,200 miles of underground circuits and add distribution automation equipment on 400 miles

■ Project $220 million investment

Phase 2 – underground an additional 1,000 miles

■ Project $210 million investment

Expect both phases to be complete by 2021
**Major Construction Projects – Peoples Gas**

**Natural Gas System Modernization Program**

Extensive effort to modernize natural gas infrastructure in city of Chicago

- Ultimately replace 2,000 miles of piping
- Approximately 25% complete*

Investment recovery under a monthly rider

- Project $280-$300 million average annual investment
- Illinois law authorizes rider through 2023

*Total program completion percentage is based on the weighted average of program categories that comprise the major components of the SMP project
Advanced Metering Infrastructure (AMI) Program

- Real-time data for faster identification of meter condition, theft of electric service and outage management
- Reduce manual work and deliver timely and accurate bills for customers
- Benefits from implementation of remote disconnection and reconnection capabilities:
  - Reduce truck rolls
  - Create efficiencies in back office and care center
  - Save lost revenue by disconnecting nonpaying customers
- Project to spend approximately $360 million through 2022 across four states we serve
Well Positioned for the Future

Acquisition of Bluewater Natural Gas Holding

- Bluewater entered into long-term service agreements with the three Wisconsin gas utilities
- Total acquisition price: $230 million
- Working gas capacity of 23.2 Bcf
- Expected to provide a utility return on capital
- Public Service Commission of Wisconsin granted declaratory ruling and approval on June 15, 2017
- Closed acquisition on June 30, 2017

Underground natural gas storage facilities in Michigan that will provide one-third of the storage needs for our natural gas distribution companies in Wisconsin.
Acquisition of Upstream Wind Energy Center

Currently being built by Invenergy in Antelope County, Nebraska

Total acquisition price: $276 million for an 80% ownership interest

Expected to provide returns that are higher than those in our regulated business

Qualifies for 100% bonus depreciation and production tax credits

10-year offtake agreement

Subject to FERC approval

Key permits and local approvals have been obtained for construction and operation

Closing anticipated in early 2019 after commercial operation is achieved
**Major Construction Projects**

**New Generation in Upper Peninsula**

- Provides a long-term generation solution for electric reliability in Upper Peninsula
- Estimated $266 million ($277 million including AFUDC) investment to be made by Michigan utility – UMERC
  - Half of investment recovered in retail rates
  - Half of investment recovered by 20-year agreement with Cliffs Natural Resources
- Allows for retirement of Presque Isle Power Plant
- Received approval and final written order on October 25, 2017
- Project is 42 percent complete

~180 MW of clean, natural gas-fired generation from Reciprocating Internal Combustion Engines (RICE)

Commercial operation targeted for 2019
Foxconn announced July 26, 2017, Wisconsin’s largest economic development project and largest corporate attraction project in U.S. history, as measured by jobs.

- Capital investment by Foxconn of $10 billion dollars
- Goal of creating 13,000 jobs, with an average salary of $53,875, plus benefits
- Estimated 22,000 indirect jobs created throughout Wisconsin
- Largest greenfield investment by a foreign-based company in U.S. history as measured by jobs
- One of the largest manufacturing campuses in the world
- Plans to be operational in 2020

Source: inWisconsin.com
Key Takeaways for WEC Energy Group

- Track record of exceptional performance
- Portfolio of premium businesses
- Investment opportunities support 5-7 percent EPS growth with minimal rate impact
- Dividend growth projected to be in line with earnings growth
- No need to issue additional equity through the forecast period
- Poised to deliver among the best risk-adjusted returns in the industry
Appendix
Still Recognizing Benefits from Acquisition

- WEC Energy Group formed in 2015 when Wisconsin Energy acquired Integrys in a transaction valued at $9 billion

- Acquisition created the leading electric and natural gas utility in the Midwest
  - Based on the number of customers, WEC Energy Group is the eighth-largest natural gas distributor in the U.S.

- Met or exceeded WEC’s acquisition criteria
  - Accretive to earnings per share starting in first full calendar year of combined operations
  - Largely credit neutral
  - Long-term growth prospects of combined entity equal to or greater than stand-alone company
Saving for Growth

Reduced O&M leads to incremental capital investment opportunities

Every dollar in O&M savings results in approximately $8 of capital investment opportunities, with no expected impact to customer rates.

* Based on a 30-year utility project at Wisconsin Electric
**Earnings Growth Drivers**

2017 average rate base ($ billions)
